

Dear Friend,

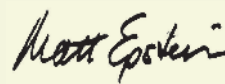

When you reached out and supported Horizons for Homeless Children last year, you might not have realized the life-changing differences you helped make for the children and families we serve. Your support was vital. You helped HHC provide programs so essential to homeless families in this difficult economic climate. You assisted in our efforts to raise the volume of supportive voices on the local and national stages in the fight for improved services for this most vulnerable population. If you visited our classrooms and Playspaces (which we encourage you to do!), you witnessed the groundbreaking, research-based work we do with children and parents to provide them with the tools and hope to succeed and break the cycle of homelessness.

Creating Possibilities: just two words, but an infinity of meaning and a lifetime of potential. Together with you, HHC is creating possibilities each day for homeless children across Massachusetts and throughout the nation. From the classroom to the boardroom, this organization provides for, serves, educates and advocates on behalf of these children and their families. With your help, we will succeed in shaping policy and focusing the public on these children and their parents. The ethical and moral case for our work is readily apparent; even in this time of deficits and budget-cutting, we believe that we can also demonstrate—to any political constituency—the value of an early investment in the children we serve.

Thank you for partnering with us as we create possibilities for homeless children. It is our hope that one day soon, their voices will be heard, their struggles will be fewer and their successes will inspire all who follow in their footsteps.
